

Science confirms New Revelation Predictions - decades later

An account showing scientific discoveries and technical developments which became reality after their predictions in the New Revelation.

This article shows that the texts called “New Revelation” dictated to Jakob Lorber and his two successors Gotfried Mayerhofer and Leopold Engel must have a higher power as author.

The first reaction of many people, who learn that Jakob Lorber received texts from God, dictated verbatim, is disbelief.

Come on, that guy talked with God? You must be joking!

This is a natural reaction of societies who have been drifting away from God. They also have been driven away from God by the media. There are several reasons. One is that society to a great extent only believes what science and research discover and publish.

The other is that the Christian churches literally forbid God to talk to humanity, or at least totally reject messages from God other than the Bible due to Luther’s statement “Sola Scriptura” So Protestant and Evangelical Churches and sects state that “Everything else claiming to be God’s Word is deceptive and of Satan”.

The Church of Rome is slightly less harsh. They know the notion of “private revelation”, which really does not help most of the time. Just recently Pope Benedict 16 reiterated the rebuff of ‘private revelations’ calling them to be of little importance in relation to the gospels (Verbum Domini 14). That the gospels, according to Jesus statements in the New Revelation, are (despite being the basis and corner stone of faith) full of falsifications introduced over time via innumerable translations and copying, is not discussed.

The argument?

With Jesus Christ and the Gospels everything had been said. There is nothing more needed. Full stop! Just ask your priest or your pastor. The reason for this is that ‘God had spoken to us by his Son.’ (Hebr. 1, 2). Moreover since Jesus we are ‘in the last days’ (1 Cor. 10, 11; 2 Peter 3, 3; 1 Peter 4, 7; 1 John 2, 18). Thus in the New Testament the messianic or Christian time was regarded as the ‘last days’, as the final age in which nothing else may be expected but the end of the world and the world-judgment.

Little do they know that this affront to God is mind boggling. God says in the New Revelation that never a century passed has without Him directly providing information to humans. However, most if not all these communications were flatly ignored by the powers that be. Already Swedenborg received a massive amount of heavenly wisdom. But it is nothing in comparison with the 25 volumes of Lorber’s New Revelation.

Every believer who is prepared to step back and think logically will come to this conclusion: Jesus Christ spent three full years and 24/7 teaching, healing and arguing with thousands of

people. So He must have done and said much, much more than the four gospels tell us. And John confirms this clearly in John 21:25.

With the 'New Revelation' the Lord "published" much more. 25 books! Why did God do that in the middle of the 19th century? Well, it was the time of the Industrial Revolution, the Enlightenment, the surge of new ideas, philosophies and philosophers, theories in science and all sections of life also causing political unrest. Darwin appeared and many others so called scientists who started the idea that either there is no God or God is dead. And Richard Dawkins is just the most recent in that line. And in view of all these enemies of God and Christendom God should or would remain silent?

Never. Exactly at that moment in history the writings of Jakob Lorber emerge predicting a number of developments, discoveries and inventions years before they came true. Today we see this with great clarity.

Take astronomy. Lorber wrote in 1850, when science just started to have an idea that the visible stars are possibly organized that we are not only in a galaxy but that there are billions of galaxies out there. Astronomers had to wait until giant telescopes like the one at Mount Wilson 68, or Mount Palomar 98 years later were available to confirm this. Starting in 1948 scientists discovered that there are subatomic particles out there with a life span of one trillionth of a second. Lorber wrote exactly that in 1840. Or in 1864 he wrote that there will be air travel, something that started in experiment form at the turn of the century 36 years later and came into reality in the 1920s.

Our point: Normal human beings can imagine or predict many things but not with such precision and scope. Thus, the conclusion is that the Lorber writings are really what Lorber claimed, the word of God.

The table below shows the time gap in years between predictions contained in the New Revelation given to Jakob Lorber and the respective scientific discoveries or developments. This is followed by the paragraphs where the appropriate predictions or claims were laid down.

Examples and sources compiled by Wilfried Schlätz, 13.12.2008

Ref	Subject	Predicted in New Revelation	Scientific discovery	Time gap in years
A	Planet Neptune	24 Oct 1842 *1	23 Sep 1846 by Galle *2	ca. 4

A - *1 Planet Neptune

Jakob Lorber, 'The Natural Sun', NS 53, 14 with footnote

[Natural Sun 01_053,01] We shall now visit the seventh belt [of the sun] which is related to a planet still unknown to you. Therefore we have to pay a short visit to this planet otherwise this sun belt would have no analogy and it could also not be inspected and identified without having first inspected and identified its corresponding planet.

[NS.01_053,02] So let us turn our attention to this planet. ... First we have to give name to this planet...

[NS.01_053,03] ...Where will we find the name? Surely not on Earth, because it knows nothing about it yet. ...So it would be best we give it the name which it has from its inhabitants. – Here you would say we don't know them either. – But I say: Even if you do not know them, I do and know exactly how they call it. And how? It is called Miron, which means as much as 'world of wonders'.

Science: *2 Discovery of Neptune

Discovered on September 23, 1846,^[1] Neptune was the first planet found by mathematical prediction rather than by [empirical observation](#). Unexpected changes in the orbit of [Uranus](#) led [Alexis Bouvard](#) to deduce that its orbit was subject to [gravitational perturbation](#) by an unknown planet. Neptune was subsequently observed by [Johann Galle](#) within a degree of the position predicted by [Urbain Le Verrier](#), and its largest moon, [Triton](#), was discovered shortly thereafter, though none of the planet's remaining 12 [moons](#) were located telescopically until the 20th century. Neptune has been visited by only one spacecraft, [Voyager 2](#), which flew by the planet on August 25, 1989.
(<http://en.wikipedia.org/wiki/Neptune>)

B – *3 About 12 billion comets orbit our sun

as *1: Jakob Lorber, "Natural Sun" 1, 4

[The Natural Sun.01_001,04] If the sun in itself represents a genuine planet it must surely comprise all those planetary elements in full which exist in lesser potencies on all the other smaller planets in its orbit. And so in the sun it can be found what it contained in much smaller form and much more incomplete in the planets Mercury....and finally in all the **roughly 12 thousand million comets** which circle this sun in immense distances.

C - *4 Atoms are divisible

Jakob Lorber 'The Natural Earth' NE 18, 8+9

[The Natural Earth.01_018,08] A grain of sand, surely the simplest of minerals, has such an artful composition that you would fully turn around by amazement if you could see its components. There you would discover many crystals of the most different kind. They are joined in a way that not even the most talented mathematician could calculate it exactly. But that is the least. Analyzing the individual crystals more precisely, you would see that they are nothing but clusters of animal corpses of a kind of infusoria. These are, however, much smaller than the more developed kind seen in a fermenting drop of water. And if you then

would have a closer look at those animal corpses you would discover in every such corps countless atomistic animals. They served as food during the life of these infusoria who now are glued together in crystal form. And if you could observe such an atomistic animal, however rather with spiritual than with natural eyes of the most sharp type, you would find in every one of those atomistic animals a nano shell globe, which depicts the whole universe in smallest scale. Combine millions into such a little crystal which is composed of 1000 infusoria and the grain of sand into 100 such crystals, you will have a little idea of the most artful set up of this most simple piece of mineral.

D - *6 There are particles with a life span one trillionth of a second

Jakob Lorber 'Gifts of Heaven': 'The Pearl Shell' 1GH, pg. 83, verse 11

[Gifts of Heaven 01_40.08.15,01] Before telling you something about this subject (the pearl shell) we have to go back so you will understand, as an advanced step cannot be understood before the previous one has become clear.

[GH.01_40.08.15,02] Behold, nobody among the scholars and so called natural scientists where one class of being in creation ends and merges in the other, nor where the first one begins. Nobody knows where the mineral realm starts and where it ends, no more does somebody know about the begin and the end of the plant realm. And even less anybody knows the begin of the animal world and its end. Because for the researcher everything seems intertwined whereas with Me there are sharp distinctions. And yes, there are in all creation no two things which would be an exception from this rule.

[GH.01_40.08.15,03] The feeble eye of such a natural scientist believes that day and night evolve a in hardly visible joint flow. But see, this notion of such a researcher is only the result of his weak inner vision.

[GH.01_40.08.15,04] For your easier understanding I will give you a few concrete distinctions.

[GH.01_40.08.15,05] Look, for he who is nature blind day and night melt closely together, he will find almost no perceptible difference between the night and the feeble glimmer of day. But when you look at a distant mountain range, especially with a hazy air, you will see the range as nothing as a flat wall, while this mountain range in anything then that as you know. Same goes for a completely flat surface like a perfectly polished diamond. If you would look at this surface with a microscope with a ten million fold zoom you find plenty of crevasses and canyons. This shows you in a natural way that the half or often completely blind nature scientists err thinking that classes, forms and characteristics merge.

[GH.01_40.08.15,06] It was important to state this beforehand, lest you cannot grasp what follows. It is better to have no idea of a thing and its circumstances than a wrong one. He who stands on a rotten step will not put his foot on the second before the first one takes him to the abyss.

[GH.01_40.08.15,07] Now notice, where the animal world starts! – You may think that the water is the mother of all animals. Well, this is not so. Because where the microscope shows you animal forms in a drop of water, the realm of the animals shows its thousand's level of development.

[GH.01_40.08.15,08] The first class of the animal world are the infinitely small inhabitants of the ether. There they are roughly what you call "atoms". They are so small (mind you for your eyes only) that on a dot, which you would only see by a very strong enlargement, there would be ample space for several trillions.

[GH.01_40.08.15,09] If you would want to see with your eyes you would have to enlarge such a point a trillion fold [10^{18}] which in your earthly lifetime you probably will never achieve, as a mortal eye will never perceive the things in their truth, but only the eye of the spirit.

[GH.01_40.08.15,10] Now you will ask where do these animals come from and how do they originate? – There I tell you: These animals originate from the confluence of the sun rays which meet everywhere in fathomless space. And therefore you will understand for what all that light which the sun projects into endless, seemingly empty space is used by Me with surely wise reason.

[GH.01_40.08.15,11] The form of these animals is a sphere and its surface extremely flush. The essence of light is their food. And their life span is a trillionths of a second [10^{18}], whereupon – uniting with trillions after their death – they start to form a second class of beings which really are not much bigger than their predecessors. However, their life is much more concentrated, so that they already have a need for food. Therefore they already have an organ and are called "Monads".

[GH.01_40.08.15,12] This species is living already in the sphere of the planet, i.e. in the orbit area of the planets. Its life span is thousand billionth part [10^{15}], of a second. Look how big the difference is between the life span of an Atom and of a Monad. But for you according to your normal senses this is not recognizable at all, as you cannot sense the difference between a trillionth and a thousand billionth of a second. And the calculation shows you the immense difference. – Well, the same way and in the same form one class after the other is formed building an ever more potentiated life until the life of these beings has grown to such intensity that it will show as a light blue mist in the highest strata of the air.

E and F - *8 There are galaxies besides our Milky way galaxy

Jakob Lorber: 'From Hell to Heaven' (Robert Blum) (HtoH) vol.2 298,6 and 303,1

The Andromeda Galaxy, M31 by Peter Shah

[From Hell to Heaven .02_298,06] Many thousands of these galaxies circle around a central center which is a central sun of even higher order. It is volume wise in the same relation many thousand times larger than all then all galaxies in its orbit. And what we are seeing now is precisely this central sun of many galaxies.

Science: *9 NEW ENCYCLOPEDIA BRITANNICA: 15th ed; MICROPEDIA; vol. 4, pg. 850.

*11 Albert Ducrocq: Matter, Frankfurt 1965, pg.40

G – H *14 and *15 There are super galaxies or galaxy clusters and super suns (quasars), as *8 “From Hell to Heaven” HtoH vol.2, pg. 299, 8

[HtoH.02_299,08] Say I: “This is a main and primary sun which keeps in its orbit 7 Million super-galaxies [galaxy clusters]. Its

size [mass] is exactly one million times bigger than that of the seven million combined. Its diameter is close to $2 \cdot 10$ at the power of 48 miles [ca. $14.8 \cdot 10^{48}$ kilometers]. Light with its electro-magnetic speed of some 40,000 German land miles per second, would take many thousand trillion earth years to travel from one pole to other of this sun.

Science: *16

I - *17 All moons always face their planets the same side

Jakob Lorber: ‘The Moon’ (Mo), 1,4

[Mo.01_001,04] Like on earth, on the moon also exist men and countless other creations. The difference, however, is that no moon is inhabited on that one side which is permanently facing its planet but always on the opposite one, because the side facing the planet holds neither air nor water or fire and all which is needed for organic life.

[Mo.01_001,05] You will ask: Why that? The answer is: because no moon must have movement around its own axis. And this as earth gravity or any other planets is too big for a moon. Had the moon a rotation around its axis, even a very small one, then for one by such a rotation the pull by the planet would be increased in the relation in which the rotation of the moon is to the rotation of the planet, meaning that if the rotation of the moon would over time be similar to the rotation of the planet, due to the increased gravitational force of the

planet one part after the other would detach from the moon and fall on the earth. For the moon such a slow rotation like the one of its planet would be of very little use in respect of the allocation of the air, the water and also the fire,, because (on that moon) everything would still be like now, namely on the side not facing the planet. In fact on a celestial body water, air and fire have to be driven by a certain speed by the protruding mountains, lest these elements which are important for organic life would accumulate on the far side of the moon through the centrifugal forces and their own fluid weight.

Science: Space probes

J - *18 Computers and robots destroy jobs

Jakob Lorber: 'The Great Gospel of John' (GGJ), GGJ.05.108, 01 and 109, 03

Chapter 108 [The age of technology]

[GGJ.05_108,01] (The Lord) "But in the end there will come a time when the people will achieve a great knowledge and skill in all things and will build all sorts of machines which will perform all human tasks just like living, thinking people and animals; but through this many people will become unemployed, and the stomachs of the poor, jobless people will go hungry. Then the misery of man will increase to an unbelievably high level. Immediately then people will be awakened by Me once again, and they will announce the truth of My name for more than two hundred years. Things will be well for those who then turn towards it, although their number will be only a small one!

[GGJ.05_108,02] However, once the number of the pure and good will have dwindled as in the time of Noah, the earth will again be visited with a universal judgment in which neither people nor animals or plants will be spared. No longer will their lethal, the fire spitting weapons be of any use to the proud people, nor their fortifications and metal roads on which they will move along with the speed of an arrow. For there will come an enemy from the air and destroy all those who have always done evil. This will truly be a time of shopkeepers and moneychangers.

[GGJ.05_108,03] What I did only recently in the temple at Jerusalem to the money-changers and pigeon-sellers, I shall do on a large scale all over the earth and destroy all the selling and money-changing stalls through the enemy whom I shall send to the earth from the vast expanses of the air like a flash of lightning and with a great thunderous noise. Truly, against that one all the armies of the earth will fight in vain. However, the great, invincible enemy will not harm My few friends but will spare them for a new plant nursery which will produce new and better people.

[GGJ.05_108,04] Do understand this well! But do by no means think that I want it thus and that therefore all this is predestined. Nothing could be further from Me and from you! Yet it will be as it was before the time of Noah. The people will keep putting their worldly knowledge and acquired skills to increasingly evil use and, of their own free will, bring upon themselves and, finally, upon the whole earth, all kinds of judgment out of the depths of My creation. But then I will say along with you, My noble Romans: *VOLENTI NON FIT INIURIA!*

[GGJ.05_109,03] The will can surely be directed through all sorts of doctrines and laws; but neither a doctrine nor any law can prevent the free will from carrying out what it wants to do. If the will of man wants to adopt a doctrine and a law as the guideline for his actions, he will in any case direct himself accordingly without any inner compulsion; but if he doesn't want this, no power of the world and the heavens can force him – and neither must! For, as I said: Without free will man is no longer a man, but instead purely an animated machine, like the machines that the people will invent with time, which will perform the same artificial tasks that now hardly any person is in a position to do. But such a machine will nonetheless not be a human being, neither according to the form nor even less to the inner freely-working reality;

K – L *19 Wireless communication, telegraph, air travel

Jakob Lorber: "Das Große Evangelium Johannes" (= GEJ); GEJ.05.46,1

[GGJ.05_046,01] (Raphael) "I tell you that there will come a time when the people will drive on iron roads as fast as a flying arrow and will speak from one end of the world to another in lightning speed, and will fly around in the air like birds, far over the seas and lands – and yet no-one will consider them to be magicians, and even less gods! Truly the ever-existent priesthood will constantly make every effort to prevent such a revelation coming to the people; but their efforts will also always be totally in vain!

Science: *20 as *2: vol. 12, 1971, pg. 128

M - *22 as *18: Nuclear standoff

The Great Gospel of John' 08 :185, 9+10

[GGJ.08:185,09] With these weapons the inventive people will come to the point when soon no nation will be able to start a war against the other, for when two nations should attack each other with such weapons then they easily and quickly will exterminate each other up to the last person, which would certainly not give a true victory and gain for neither one of them. Those kings and their generals will soon realize that, and that is why they will rather tolerate each other in peace and good friendship. And if somewhere a very proud and ambitious disturber of the peace should rise and would attack his neighbor, then the peaceful ones will unite themselves and chastise him. And in this way the ancient peace will be set for the people on Earth and will be established durably.

[10] If one will count, from this My actual presence, almost 1800 and almost 90 years, there will hardly be any more war on Earth, and more or less in that time, also My personal coming on this Earth will take place, and the greatest enlightenment of men will begin.

Science: *23 as *2: vol.8, 1969; pg. 516

N - *24 as *18: Environment problems

The Great Gospel of John' 09, 63.06

[6] As long as such forests on Earth exist in sufficient numbers and the nature spirits which continuously come down from all the stars to the Earth and those that are climbing up from the Earth while they are developing themselves, can be taken up in such forests where they can find their well-ordered accommodation, then you will not see all too heavy stormy natural disasters and all kinds of epidemical diseases to arise, but once the covetous pursuit of profit of men will violate too much the forests, it will also be hard for the people to live and to exist on this Earth, and more heavily so where the thinning out of the forests will have the upper hand. This you also can remember to warn the people on time for such thoughtless undertakings.

*25 as *18: The Great Gospel of John' 05.109, 01+06+07

[GGJ.05_109,01] (The Lord :) "Look at the mountains full of forests and shrubs. Behold, these absorb a suitable number of all the nature spirits (electricity, magnetic fluid) compatible with them. Go and deforest all the mountains and you will soon become aware of the most dire consequences. Thereby great masses of free, very crude nature spirits will begin to more and more fill the atmosphere above the whole earth. Since these do not find a suitable abode and sphere of activity, they will begin to cluster in great masses and, driven by their hunger and thirst (assimilative instinct), cause the worst, all-devastating gales and ruin entire countries to such an extent that in a hundred, often a thousand years nothing will be growing there but here and there a moss plant. Thus there are to this very day on the wide world places extending for many leagues which are as bare of vegetation as the desolate, barren limestone on the shores of the Dead Sea in Lower Palestine into which the river Jordan is flowing.

[GGJ.05_109,02] Well, is that perhaps My will? Oh no! Where men must have freedom of will and freedom of action so that they can become human beings also in spirit, I Myself do not interfere — no matter how foolishly they may act. All I do is allowing them to reach, unperturbed, that which they have so eagerly striven for as if their life's happiness depended on it. It does not make any difference to Me whether the consequences are good or bad. What they create they get. Although I know what will happen afterwards, I can — and must — not intervene with My omnipotence; for if I do that, man ceases to be a man. He is then nothing else but an animated machine and can be of no value forever, either for himself or for Me. For he resembles a writer who is not capable of writing any syllable himself, but if he should write nonetheless, a scribe must guide his hand from A to Z; and if he has written an essay in this way, he nonetheless does not understand it. And even if he has written a hundred thousand letters in this way, he is nonetheless just as little a writer himself as the stylus with which he wrote. Just as little the man of this Earth would be a man if the free will was not left thoroughly untouched and likewise his acting.

[GGJ.05_109,03] The will can surely be directed through all sorts of doctrines and laws; but neither a doctrine nor any law can prevent the free will from carrying out what it wants to do. If the will of man wants to adopt a doctrine and a law as the guideline for his actions, he will in any case direct himself accordingly without any inner compulsion; but if he doesn't want this, no power of the world and the heavens can force him – and neither must! For, as I said: Without free will man is no longer a man, but instead purely an animated machine, like the machines that the people will invent with time, which will perform the same artificial tasks that now hardly any person is in a position to do. But such a machine will nonetheless not be a human being, neither according to the form nor even less to the inner freely-working reality; for it has no free will and can therefore never perform any independent action. Whatever the human will has laid in it, it will perform, and never anything else.

[GGJ.05_109,04] But man can, out of himself, do whatever he likes, and no one can prevent him from doing it. Thus, man can do what he likes with the earth that carries and nourishes his body; and only the consequences will teach him whether his will was good or evil.

[GGJ.05_109,05] Therefore every human being has reason and as a consequence of that, intellect. He can become enlightened through doctrine, worldly laws and every kind of experience and then choose spontaneously what is good, right and true and determine his course of action accordingly. With all this he suffers no coercion, since he himself chooses freely what he has recognized as good, right and true.

[GGJ.05_109,06] But we can experience only too tangibly day by day from hundreds of cases that people nonetheless very often spurn all they have recognized as good, just and true mostly out of temporal interests, and act to the contrary. And from this proceeds the fact that the freedom of human will cannot be endangered or restricted by anything. And so it is very possible that as time goes by people will be able to invent great things and also affect the nature of the Earth, so that in the end it will have to be quite considerably damaged. The consequences of this will certainly not be anything pleasant and will seem to be a certain punishment for the wrongly used will, but not wanted at all by Me, but instead brought forth through the will of man.

[GGJ.05_109,07] If the people want another Deluge, they only have to dig up the mountains and they will open the floodgates of the underground waters! If they want to see the whole Earth in flames, they only have to destroy all the forests, and the spirits of nature (electricity) will multiply so much that the Earth will suddenly be clothed in an ocean of fire and lightning! Would it then be Me who want to destroy the Earth through the fire?! Therefore teach the people to be wise, otherwise they themselves will bring the curse of judgment upon themselves! But I know that it will happen, and nonetheless I cannot and may not act against it through My omnipotence, but only through My teaching – do you understand that?"

*26 as *18: The Great Gospel of John' 08.186, 05+06

[5] In such cities, through excessive pursuit of profit, all kinds of factories will be build on a large scale, and instead of human hands the work will be done by fire and water, together with thousands kind of artful machines that are made of metal. The heating will be done by means of the ancient coals of the Earth that men will acquire in extremely great quantities from the depths of the Earth.

[6] Once such activity will have attained its highest point by the force of the fire, the air of the Earth will become too strongly saturated on such places of the Earth with combustible kinds of ether, and these will soon ignite here and there and transform such cities and regions together with their many inhabitants into ruins and ashes, and that will then also be a great and effective purification. But whatever the produced fire will not have accomplished that all kinds of great storms on Earth will accomplish, obviously only there where this will be necessary, for without necessity nothing will be burned or destroyed.

*27 as *19: The Great Gospel of John' 03. 033, 04

[03_033,04] But soon after this time life for man will be very bad on the Earth; for the earth will become infertile, heavy price increases, wars and famines will appear, and the light of faith in the eternal truth will disappear in many places, and the fire of love will dim and cool, and the last fiery judgment will come over the earth!

O - *28 Breathing of the Earth

as *4: Natural Earth NE 8

[NE 01_008,02] The breathing in of the body of the Earth can everybody see on the beaches of the oceans when he see the regular increasing and receding of the waters. If now such an exterior phenomenon is present everybody can conclude with certainty that it can only be an inner and not an outer reason.

[NE 01_008,04] The earth aspires the air and the softer belly area of the earth which usually is covered with water extends, the level of the sea water raises on the firmer coasts. When the earth or rather its lung expels the breath, the belly sinks lower and the sea level also lowers.

[NE.01_008,05] This had to mentioned first for you to understand that the earth breathes and for this it also has to have tools for breathing. These like several other tools constitute the innards of the earth.

[NE 01_008,06] The question now is: Where is this lung of the earth situated, where does the earth breathe in and out? And what does this lung look line?

[NE 01_008,07] This earth lung with a volume of thousand cubic miles is situated for one below the hard and firm crust and covers an area of more than 5000 square miles. This lung is a grandiose cell network with a great quantity of hollow cells interconnected by tubes of various sizes.

These tubes have two characteristics: first to lead the air into the cells and let it out again. Second the tubes because of their elasticity can contract and expand which contracting and expanding is done by the constant polar change or by the conversion of the positive to the negative pole, where this conversion is based on the spiritual substance as without such conversion a free movement within the bodies would not be thinkable.

[NE.01_008,08] If now these tubes expand the cells are compressed, and this results in the air to be expelled. If these tubes contract again the cells expand naturally which results in the breathing in.

[NE.01_008,09] The polarity inversion happens – as much as can be explained in a physical way – by the fact that as soon as the soul has absorbed the life substance of the inhaled oxygen only the oxygen remains. This results in the positive pole at inhalation to change into negative because it is in no connection with the oxygen.

[NE.01_008,10] This soon contracts the tubes and soon new air is breathed in by which of course the negative pole changes to positive and vice versa.

[NE.01_008,11] So we now know about the breathing business of the Earth and where the lung is situated. But where does in breathe in and where out? This Earth does like an animal which breathes in through the mouth and nose like humans, the same goes for the Earth. She breathes in through the same main mouth through which she takes in nourishment only at half way from this main orifice there is a side orifice which can be opened and shut at will like with an animal. This big side orifice leads into the great lung. There every six hours there is inhaling and exhaling. During the taking of a breath the gullet closes and once a proper quantity of air is breathed in the air tube closes like a larynx while the gullet opens again. When the air of the lung is pushed out again the gullet closes again and this way via the lung the earth is constantly nourished in the abovementioned sequence but into the stomach through the gullet only every 12 hours during which it takes in nourishment in a way that the lung in a manner of speaking chemically fragmentizes the aspired air and splits up the life element. Thus one can stipulate that within 24 hours the Earth inhales twice and exhales twice while only absorbing two times nutrition its stomach.

*29 Neue Illustrierte Wochenschau, 18th January 1970; Nbr.3-APN-information

P - *30 as *18: New epidemics

Great Gospel of John GGJ.06.150,15 and GGJ.08.185,03

[GGJ.06.150,15] Towards the end of the indicated period, I will awaken even bigger prophets and with them also the judgments will increase and become more widespread. There will occur great earthquakes and very destructible storms of elements, large price increases, wars, famine, pestilence and many other disasters, and as I have already remarked earlier, faith will - accept for a very few - not be among the people, and will be frozen in the ice of the people's haughtiness, and one nation will attack the other.

16] The people will be warned through seers and special signs in the sky, of which only a few of Mine will take note of, while the world-people will only regard this as effects of nature and spit on those who still believe in Me.

17] Thereupon the greatest revelation through My repeated return to this earth will take place; but this revelation will already be preempted by the greatest and sharpest judgment and be followed by a general thinning of the world-people through fire and its projectiles, so that I Myself can establish a completely different plant-school for true people on this earth, which then will last until the end of times of this earth.

The Great Gospel of John GGJ.08.185,03

[GGJ.08.185,03] So, one people will rise up against another and will attack them with weapons of fire. Because of that, the rulers will come into great debts that cannot be paid off and will afflict their citizens with unaffordable high taxes. Because of that, there will be an excessive high cost of living, famine, many malicious diseases and epidemics and pestilence among the people, the animals, and even the plants.

[4] There will also be heavy storms on the mainland and on sea, and earthquakes, and the sea will flood its shores in many places, and then the people will come into great fear and anguish because of the expectation of the things which will then come over the Earth.

Q - *31 Steam and combustion engine

[Great Gospel of John GGJ.08.185,07]

[7] And in that same time, also the natural fire will play an extremely important role. The fire will drive the ships over all the seas with the speed greater than that of the wind. Also, men will make with their sharp intellect iron cars and roads, and instead of pack animals they will harness fire to the cars, and with its great power they will drive off far over the Earth, faster than an arrow that has been shot off.

Science *32: Combustion engine around 1900

R - *33 Worldwide Communications: Cable and Wireless (Telegraph, Radio, Fax, E-mail) GGJ.08.185,08

[8] In this manner they also will be able to control the lightning and make it the fastest transmitter of their wishes and their intentions from one extreme of the Earth to the other.

Science: From 1893 (Tesla) and 1897 (Marconi)

S - *34 WMD: Nuclear weapons (Missiles, nuclear warheads and artillery)

GGJ.08.185,08-09

[8] ...And if they - the proud and greedy kings - will wage war against each other, the fire will render a great and decisive service, for by its great power, iron masses in the form of a sphere with a heavy weight will be flung with the speed of lightning to the enemy, the cities and strongholds and cause great destructions.

[9] With these weapons the inventive people will come to the point when soon no nation will be able to start a war against the other, for when two nations should attack each other with such weapons they easily and quickly will exterminate each other up to the last man, which would certainly not give a true victory and gain for neither one of them. Those kings and their generals will soon realize that, and this is why they will rather tolerate each other in peace and good friendship. And if somewhere a very proud and ambitious disturber of the peace should rise and would attack his neighbor, then the peaceful ones will unite and chastise him. And in this way the ancient peace will be set for the people on Earth and will be established durably.
